SKILLS

Back-End

I have experience in Java and PHP, Spring Framework and Spring Boot. In addition to this, I manage Databases such as MySQL, PostgreSQL, and SqlServer.

Front-End

I have experience in Angular and Bootstrap, Ajax, CSS, JavaScript for the development of web applications, and I am also learning React Native for the development of mobile apps.

Other Skills

I have experience in Amazon Web Services (AWS) for cloud solutions. I work with the following servers: Apache, Windows Server, and Ubuntu. In addition to this, I use tools such as NetBeans, Postman, and Git for development and testing. For more details about my skills you can check my LinkedIn profile attached in a QR at the end.

PROFESSIONAL EXPERIENCE

- **Technical Support Engineer / Data Analyst (2025)**
Fulzer SA.
During my time at the company, I was responsible for providing technical support to the team and users regarding the company's systems, as well as being in charge of creating and maintaining dashboards in Power BI.
- **Software Developer (2023)**
Commercial Belloso (COBECA).
My role in the company during my work period consisted of providing development, support and maintenance to the administration, storage and merchandise dispatch systems of the different drugstores of the company, making corrections, modifications and adding new functionalities to the systems using as the main language JAVA.
- **Developer / GPON Technician (2021)**
Fenix Corporation
In the company, I was in charge of maintaining and updating the main system used for the administration of clients. Edema was in charge of the construction and maintenance of the FTTH network.
- **Web Developer (2019)**
Zulia Agroindustrial Investor
During my stay in the company I carried out two developments which correspond to a web page and a web inventory system, both carried out in a web environment using JAVA and JavaScript as the base language.
- **Systems Analyst (2018)**
Catatumbo Insurance C.A.
In this company, I developed maintenance and support activities for the different systems that are used in each of the branches nationwide, making corrections and modifications in programs developed with RPG IV ILE in ISeries. I was part of the beginning of a new web system developed based on PHP for which I was in charge of making the first options and the initial structuring of the project.
- **Junior Developer / Technical Support (2015)**
Zulia State Road Institute (INVEZ)
Due to the performance developed during the academic internships, they proceeded to hire me. In addition to technical support, I had the opportunity to participate in a project developed in PHP.
- **Intern (2015)**
Zulia State Road Institute (INVEZ)
These internships were carried out for 3 months in which I carried out technical support activities.
